Highlights

venkat.kagita@nitw.ac.in

6281746931

- ✓ 15 days course
- ✓ Two hours per day.
- ✓ Flexible timings: 6 PM to 8 PM.
- ✓ Hands-on experience with Python.
- ✓ Real-world projects.
- ✓ Online course.

**Organized by Department of CSE
Coordinator and Instructor:**

Dr. Venkateswara Rao Kagita

**30 hours Course
on
Machine Learning for
Data Science
using Python
(July 16th – 30th, 2022)**

In association with Center for Continuing Education (CCE), NIT Warangal

Course Content

➤ Introduction

What is Data Science, Real-life examples and Applications, Data Scientist roles, Machine Learning vs. Data Science vs. AI, Machine Learning types, Generics of ML approaches.

➤ Python Essentials

Data manipulation tools, NumPy, Pandas, Visualization, Scikit-Learn.

➤ Probability and Statistics for Data Science

Basic probability theory, Random variables, Probability distributions, Markov models, Bayesian learning, Applications.

➤ Regression Analysis

Univariate linear regression, Multivariate linear regression, Polynomial Regression, Applications.

➤ Classification

Logistic regression, SVM, Multi-class SVM, Decision trees, Applications.

➤ Ensemble Approaches

Bagging, Random Forests, Boosting: Adaboost, Gradient boosting, Applications.

➤ Optimization

Gradient descent, Stochastic gradient descent, Batch gradient descent.

➤ Clustering

Different clustering approaches and applications.

➤ Feature Engineering

Feature Scaling, Feature Selection: Filter methods, Wrapper methods, Embedded methods.

➤ Dimensionality Reduction

Principal component analysis, Linear discriminative analysis, Multiple discriminant analysis, Independent component analysis.

➤ Neural Networks

Introduction to neural networks, Back propagation algorithm and theory behind, Introduction to deep learning, Convolutional neural networks.

➤ Reinforcement Learning

Markov Decision Process, Planning, Estimation, Control and Applications.

➤ Recommendation Systems

Introduction, Types of recommender systems, Content-based, Collaborative filtering: Matrix factorization based approaches, Knowledge-based, and Hybrid techniques, Times series forecasting, other real time examples.

➤ Hands-on to the majority of the topics using Python.

Projects

✓ House price prediction using regression techniques.

✓ Customer churn prediction using decision tree & ensemble approaches.

✓ Handwriting digit recognition using neural network.

✓ Diabetics prediction using logistic regression.

✓ Color compression using K-means clustering

✓ Self-Driving Cabs using Q-Learning

Where Technology Meets Innovation

Registration Fee

Category	Amount
Academic	Rs. 1000/-
Industry	Rs. 2000/-

Account Details

Account Number	62403680215 (Savings Account)
Account Name	Center for Continuing Education NITW
Bank Name:	State Bank of India
Branch:	NIT Warangal
IFSC Code	SBIN0020149

Registration link: <https://forms.gle/bFJUpJmVt8fhfGtf7>

Enter 'DSMLM' code in the remarks while making payment so that it is easy for us to track.
